

Identifying opportunities to enhance your bottom line by optimizing your compressed air system is the main focus of the Compressed Air Challenge. In this one-day seminar, we'll provide the informational tools you need to effectively evaluate your own system while achieving greater productivity, reduced downtime, energy savings, increased product quality and greater efficiency.

Seminar agenda

8:00 a.m. – 4:30 p.m.

Why care about air?

- Compressed Air Challenge questionnaire
- Pre-workshop assignment

Study your supply side

- What is supply side?
- Typical components of the supply system

Understand your demands

- Typical components of demand
- Inappropriate uses of compressed air
- Common leak locations and how to fix them

Are you on base?

- Baselining basics and techniques

Stay under control

- Controls, part-load efficiency and storage

Maintaining system efficiency

- Simple, quick cost-cutting measures
- System demand profile

Get with the plan

- Seven step and personal action plan

Registration & payment options

Space for these courses is limited and pre-registration is encouraged. Please complete the form and mail or fax using the information below.

E-mail: Please send registration form information to
Peggy.Duke@PacifiCorp.com

Mail: PacifiCorp, Peggy Duke, 825 NE Multnomah, Suite 300
Portland, OR 97232

Fax: (503) 813-5231

Cost

\$75 for first person from a company

\$60 for each additional person from the same company

Payment can be made by mail or at the event by check payable to PacifiCorp or with Visa or Discover. (*Sorry, we cannot accept American Express or MasterCard.*) If paying by credit card please fill out credit card section at right.

Instructor

Chris E. Beals is president of Air Systems Management, Inc. and serves as instructor for the U.S. Department of Energy's Compressed Air Challenge Seminars. Having presented multiple compressed air seminars for the Association of Facilities Engineers, the U.S. Department of Energy and other organizations, Beals brings a breadth of industry knowledge and first-hand experience to his audiences.

Beals has owned and operated a gas compressor packager and air compressor distributorship, has served as a consultant in the field and has conducted audits on more than 90 plant air systems in a variety of industries. Defining existing air and electrical demand and designing solutions to problem applications and retrofit requirements for payback have been integral to his work. Beals has had more than three decades experience in industrial process equipment analysis.
